To whom it may concern

Dear Sir

REF. 1Energy Hybrid Power Plant for Desroches Island, Seychelles

In 2013 we commissioned Aurecon to administer a tender process for the provision of a solar power solution for Desroches Island, where we own and operate the luxury Desroches Island Lodge.

1Energy's submission impressed us in its professional approach, competitive pricing and in their thorough analysis and technical treatment of the required solutions. In short, 1Energy emerged as the preferred bidder from the seven submissions we received.

Our confidence in 1Energy was further reinforced in our subsequent discussions, and during the on-site assessment undertaken by Andy Heathcote-Marks in mid-2014. Regrettably, however, The Collins Group at that time entered into a partnership with another organisation, and it so happened that our new partner has a subsidiary providing solar power solutions. As a result, and unfortunately for 1Energy, these events overtook our process, since it made better business sense to proceed with the new in-house solution for our solar system installation.

I can personally vouch for Reinhard, Andy and the team at 1Energy, and have no hesitation in recommending them to any organisation seeking a properly and professionally engineered solar power solutions.

Yours sincerely,

LAURIE WARD

Portfolio Manager/Director of Desroches Island Lodge Limited
