TESTIMONIAL FOR 1 ENERGY, HEADED BY REINHARD MARX

The installation of a solar power system on Tolo Game Farm, part of Sigurwana Game Lodge, and owned by L Wright Game Farms

The installation took place in June 2013.

The solar power system was for a three-bedroom house with two bathrooms, a large open plan kitchen with lounge and dining area. The house has two large verandahs; one acting as a car port. The house also has a workshop and outside room.

Reinhard Marx and his company "1 Energy" undertook the initial survey to establish the necessary power required. He then established the necessary voltaic panels, batteries and size of inverter, etc that the project would need. We duly accepted 1Energy's quote and specifications.

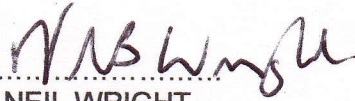

We can only confirm that in providing this testimonial the whole project was undertaken with the utmost efficiency and professionalism. The standard of equipment used was high. One can see that only world-class products have been used. The whole installation is impressive.

We can also confirm that the installation was done with the minimum of problems. The team under Kobus Carstens was very competent and experienced.

Since installation the system has worked well. The inhabitants of the lodge are very pleased with the reliability and the output of power to run the house.

We are very happy to recommend 1Energy and the team co-ordinated by Reinhard Marx for any solar power system that they undertake.
